Notes for the Planning Department Fee Schedule

Administrative Costs - Actions requiring payment for administrative costs may be billed to the applicant. Administrative costs may include but are not limited to the following: staff time, publishing costs, copying, printing and mailing. The actual hourly rates of the employees will be used plus a multiplier of 2.0 times for benefits.

Administrative costs will accrue after the first meeting with the applicant.

Engineering

A. Private Developments

The development fees for private developments apply in situations where private developers choose to construct the public improvements, rather than having them constructed by the City. The fees that the City charges in those situations are intended to reimburse the City for all of the direct and indirect costs incurred by the Public Works Departments to process the development application, to process and administer the project, to review and approve the plans for the project, and to inspect the construction of the project. The percentage used for various items are based on the historical costs incurred by the City.

The Developer shall reimburse the City for costs associated with the first bituminous seal coat performed on the bituminous paved streets within the plat. The costs shall be based on the latest contract unit prices the City has received plus 3% for next year's increases and administration costs. The estimated City fee shall be deposited with the City at the time the Developer's Agreement is signed.

Streets and Utilities

The Development Fees for private developments include a lump sum of 7.5% of the estimated construction costs for the following: public sanitary sewer, public storm sewer, public street construction, sidewalks, boulevard trees and other appurtenances. Storm water management reviews will be charged on an hourly basis. The developer shall deposit 2% (minimum of \$5,000) to pay for storm water management reviews.

Watermain

The Development Fees shall also include a lump sum of 4.0% of the estimated construction costs for public water, based on the following breakdown:

Administrative Fee	1.50%
Plan Review/Coordination Fee	2.50%
Total	4.00%

Note: Watermain inspection fees are charged separately from the Shakopee Public Utility Commission

Grading Fee - Costs up to \$200,000

For grading projects up to \$200,000, the Development Fees shall also include a lump sum of 5.5% of the estimated construction costs for site grading and erosion control, with a minimum fee of \$50.00.

Grading Fee - Costs Greater than \$200,000

For grading projects greater than \$200,000, the Development Fees shall include a lump sum fee of \$10,000, plus a 3.0% inspection fee for the site grading and erosion control costs over \$200,000.

NPDES compliance inspections will be charged on an hourly basis. If outside consultants are used the costs will be charged to the developer. If City employees are used the developer will be charged actual hourly rates plus a multiplier of 2.0.

B. Trunk Storm Water Charges

A fee of \$.11 per developable square foot will be charged to all new developments, per the City's Trunk Storm Water Charge Policy. The term "net developable foot" means the total square footage of a development within the city limits minus the portion of the development used for public right-of-way, lakes, wetland areas, stormwater ponding easements, and parks.

C. Trunk Storm Water Storage and Treatment Charges

A fee will be charged to all new developments that utilize regional ponding systems, per the City's Trunk Storm Water Charge Policy. This fee shall be as follows:

Developments having a net density of 3 or less lots/acre	\$.056 per developable sq. ft.
Developments having a net density of more than 3 lots/acre	\$.106 per developable sq. ft.
Commercial, industrial, or institutional development	\$.184 per developable sq. ft.

A fee will be charged to developments that utilize regional infiltration ponding systems as follows:

New impervious area of development	\$976.00/new impervious acre
------------------------------------	------------------------------

D. Trunk Sanitary Sewer Charges

A fee of \$1,958.00 per net acre will be charged to all new developments, per the City's Trunk Sanitary Sewer Charge Policy. The term "net acre" means the acreage equal to 85% of the gross acreage of the development.

E. City Projects and Miscellaneous Engineering Work

A 1% project administration fee will be charged to all projects.

Other Costs incurred will be added in using the actual costs (ie. Consultant fees, testing laboratories, etc.)

F. Grading Permits

Grading Permit Fee - Estimated Costs up to \$200,000

For grading projects where the estimated grading cost is up to \$200,000, the grading permit fee shall be a lump sum of 5.5% of the estimated construction costs for site grading and erosion control, with a minimum fee of \$50.00.

Grading Permit Fee - Costs Greater than \$200,000

For grading projects greater than \$200,000, the grading permit fee shall be a lump sum fee of \$10,000, plus a 3.0% inspection fee for the site grading and erosion control costs over \$200,000.

NPDES compliance inspections will be charged on an hourly basis. If outside consultants are used the costs will be charged to the developer. If City employees are used the developer will be charged actual hourly rates plus a multiplier of 2.0

Unauthorized work permit

Fee is up to double the permit fee

G. Building Permit/Grade Check Fee

For all single-family building permits issued, a fee of \$50 will be added to the building permit fee for review of the proposed grades on the certificate of survey.

For all multi-family, commercial, industrial, and institutional building permits issued, a grade check fee of \$50, plus an additional fee of \$20 per acre (area of the lot), will be added to the building permit fee.

H. Permit to Work in Public Right-of-Way Fees
